To Whom It May Concern,

Truth Mjumbe (DOB 07/20/01) is a patient of mine at the Emory Brain Health Center where he is treated for his epilepsy. Due to occasional seizures and medication side effects, He often requires extra time to rest and recover. As a results, He may need additional time on taking notes, quizzes, assignments, in-class & online testing, and deadlines. Please do not hesitate to contact me with additional questions or concerns.

Thank you for your understanding in this matter.

Please do not hesitate to contact me with any questions.

Sincerely,

Brian T Cabaniss, MD
